

LOCAL RESTAURANT RAISES FUNDS FOR DISABLED FLYING ASSOCIATION

A local restaurant showed its community spirit after raising money for the British Disabled Flying Association. Elstree based 3 Greens Restaurant held a raffle for its loyal customers recently and raised £325 for Caroline Whitney's chosen charity. Prizes on offer included a flying lesson, helicopter ride and luxury Easter egg. It was through a chance meeting with the BDFA's Chairman Simon Rapkin that prompted

Caroline to support the charity, and she was overwhelmed by the generosity of her customers and those who donated prizes. She told *My Bushey News*: "I was extremely impressed with the work this charity does as it helps a number of adults and children with learning disabilities. My initial aim was just to raffle off a luxury Easter egg, but because of a number of generous donations, I was able to offer a few more exciting nice prizes." BDFA Chairman Simon was delighted with the money raised by 3 Greens, and couldn't thank the staff and customers enough for their incredible help in raising some much needed funds. He told *My Bushey News*: "This money will be used to help subsidise two flying days we are running at Elstree Aerodrome this summer – when we will be working with Guideposts Trust and Barnet Mencap to get as many adults and children with learning disabilities into the air as possible. The generosity of 3 Greens will go a long way to achieving this." The winner of the first prize on offer, a helicopter ride, was a Mrs Woods. On winning her prize, she said: "I was very surprised to win, but I am also extremely excited." The winners of the raffle are listed below:

RAFFLE WINNERS

Mrs Woods – Stanmore Helicopter Ride
Sergey Lopitin – Hendon Flying Lesson
MJ Murphy – Chorleywood Flying Book
Peter – Pilot Pack
Dave Doyle Giant Luxury Easter Egg

Bronsbury Heating and Plumbing Services

If your current heating system is over 6 years old, then it's time to power flush your system.

Power Flushing
Restores heating systems to peak performance

- Restores optimum efficiency
- Removes magnetite sludge
- Removes black iron oxide
- Helps pump circulation
- Prevents corrosion
- Reduces boiler noise
